Welcome to Acme

Acme Labs builds workflow software for logistics companies. We have offices in Bengaluru, Pune and Singapore, and about 180 people across product, engineering, sales and support.

This handbook explains how we work together. It covers leave, expenses, security, on-call duty, equipment and remote work. If something is unclear, ask your manager or write to people@acme.example.

Our working day runs from 9:30 to 18:00 local time, Monday to Friday. Public holidays follow the calendar of the office where you are based.

Leave policy

Full-time employees receive 24 days of paid annual leave in each calendar year. Leave builds up month by month from the joining date, so new joiners receive a proportional amount in their first year.

Up to 5 unused days can be carried over into the next calendar year. Anything above that expires on 31 March. Leave requests should reach your manager at least two weeks in advance for absences longer than five days.

Sick leave is separate from annual leave: 10 days per year. A doctor's certificate is required once an illness lasts more than 3 consecutive days.

Expenses and reimbursement

Staff can claim back money spent on business trips, client meals and approved training. Keep every receipt and upload it to the expense portal within 30 days of the spend.

Any single expense above Rs 5,000 must be approved by the finance team before the money is spent. Smaller expenses only need approval from your line manager.

Approved claims are paid into your salary account within 10 working days. Claims without a receipt are rejected, except taxi rides under Rs 200.

Information security

Passwords must be rotated every 90 days, and the new password may not repeat any of your last five. Multi-factor authentication is mandatory for email, the code repository and the production consoles.

All laptops use full-disk encryption. Screens lock automatically after 5 minutes of inactivity. Never store customer data on personal devices or in personal cloud storage.

Report a lost laptop or a suspicious email to security@acme.example immediately; do not wait until the next working day.

On-call duty

Engineers on the platform team take turns being on call. A rotation lasts one week and the hand-over happens on Monday at 10:00 in the engineering channel.

If a page is not acknowledged within 30 minutes, it escalates automatically to the engineering manager. The person on call should stay within reach of a laptop and a stable internet connection for the whole week.

Each week of on-call earns one additional day off, to be taken within the following two months.

Hardware and equipment

Laptops are replaced every 36 months. To request a new machine or a replacement, open a ticket with the IT service desk; delivery normally takes 5 working days.

Accessories such as keyboards, mice and headsets costing less than Rs 3,000 need only your manager's approval. Monitors are provided for office desks only.

When you leave Acme, return all equipment within 7 days of your last working day.

Remote work

Most roles can work remotely up to 3 days per week. Please be reachable during core hours, 11:00 to 16:00 local time, regardless of where you work.

Working from another country for more than 14 days needs written approval from your manager and the people team, because of tax and legal rules.

A monthly stipend of Rs 1,500 helps cover internet costs for employees who work remotely at least two days a week.
